

Pezhman Mohammadzadehkordestani

App Designer

Summary

as a multidisciplinary designer with a background in architecture and a strong passion for digital product and application design. Currently studying Design for the Built Environment at University of Naples Federico II, I combine architectural thinking with UI/UX design, cinematic visuals, and emerging technologies to create immersive digital experiences. My projects, such as [Spark](#) – an AI-driven challenge-based learning and productivity app – and [the Cosmos Project](#), a cinematic ecosystem of interconnected space-focused applications, reflect my interest in designing meaningful systems that connect creativity, technology, and human experience. Inspired by astronomy and visionary minds like Leonardo da Vinci and Galileo Galilei, I aim to create digital experiences that merge art, science, and innovation into emotionally engaging and futuristic designs.

Experience

Jan 2014 Freelance designer and photographer

Orion Group, Kermanshah, Iran

Engaged in freelance artistic activities focused on architecture and photography alongside studies and main job. Produced customized visual concepts that optimized marketing materials, resulting in improved brand consistency and accelerated campaign deployment. Captured ambient and staged imagery for marketing campaigns, enhancing visual appeal and accelerating client approval cycles.

Jul 2019- Jun 2022 Architect and interior designer

Iraman engineering office Co., Kermanshah, Iran

Worked as designer and supervisor of one of the company's design teams. Integrated sustainable materials into interior layouts, advancing environmental compliance and elevating client satisfaction through innovative design solutions. Developed customized spatial concepts that enhanced aesthetic coherence and improved client engagement throughout project execution.

Leadership

Jul 2017-
Jun 2019

Architect trainee
Iraman engineering office Co., Kermanshah, Iran

Worked as an architectural intern and assistant designer producing architectural plans using architectural software. Applied university learning in practical work. Drafted detailed architectural plans utilizing CAD software to enhance design accuracy and streamline project coordination across multidisciplinary teams. Produced 3D architectural models to assist visualization efforts, improving stakeholder understanding and supporting more informed design decisions.

Education

Feb 2012- May 2017 **Bachelor of Architecture**
Islamic Azad University, Kermanshah, Iran

Oct 2023 **Master's degree in Design for the Built Environment (Digital Design specialization)**
Federico II University of Naples

Oct 2025- Jul 2026 **ALUMNI**
Federico II University, Apple Developer Academy, Naples, Italy
Participant in the 9-month Apple Developer Academy at the University of Federico II in Naples, with a strong focus on UI/UX design and product design. The program emphasized human-centered design, design thinking, user research, prototyping, and usability testing, working in multidisciplinary and international teams. Gained hands-on experience in designing digital products from concept to MVP, translating user needs into intuitive interfaces, and developing user-centered solutions within the Apple ecosystem.
